**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/36751

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/36751

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-49</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>1-49</u>	YES
	Claims <u>NONE</u>	NO
Industrial applicability (IA)	Claims <u>1-49</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-49 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method of authenticating one or more instantiations of a product following initial distribution, comprising providing a code string model, providing a subset of unique code strings, defining a maximum allowable probability of guessing any of the subset of unique code strings, verifying that the actual probability is less than the maximum allowable probability, randomly generating the subset of unique codes, providing a secure server with a database to store the subset of unique codes, storing the subset of unique codes in the database, marking each of a quantity of instantiations of a product with one of the unique codes of the subset of unique codes, distributing the marked instantiations of the product along a chain of commerce, validating the authenticity of one of the marked instantiations of the product during or following distribution by means of an exchange of signals between the secure server and a communication device, all in combination with all of the other recited structural elements of the claims.

Claims 1-49 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
